

WCG ARRAY'S HYBRID SOLUTION

Unify Your Meeting's Audience Engagement

OVERVIEW

With WCG Array's Hybrid Solution, you can create a synchronized and consistent experience for in-person and virtual participants with simultaneous interaction with content and engagement features.

93%

participation rate with WCG Array Managed iPads.

15+

years of experience improving content engagement.

96%

of attendees report that having WCG Array improved their experience.

7k+

in-person, virtual, and hybrid life sciences meetings.

For Your In-Person Audience

Impress with individual WCG Array Managed iPads for every participant.

Engage with 25+ interactive features, such as polling and surveys.

Connect with a secure local network that is more reliable than Wifi.

For Your Virtual Audience

Create a consistent experience with WCG Array's web portal.

Give a voice to every participant through digitally-managed Q&A.

Bring them into the room with presenter and audience video feeds.

Full Service Deployment

- Engage everyone with WCG Array Managed® iPads set up for every in-person participant.
- Local closed network and local in-room server ensures connectivity without WiFi dependence.
- WCG Array technicians onsite for set-up, streaming management, and live technical support.
- Speaker training before the event.
- Notes and saved slides sent to the audience members after the event.
- Remote Clinical Sites can participate virtually together from one location while each person engages uniquely with Array —and gets credit for attending-- via their smartphone simply by scanning a QR code.
